

MAGNETO BATTERY KILL SWITCH

PART NUMBER: FR1010

INSTALLATION INSTRUCTIONS:

- The purpose of this switch is to completely disable the vehicle power with one switch.
- **CAUTION:** Prior to installation, verify proper magneto shut down procedure with magneto manufacturer to avoid damage to magneto, computer, or electrical system.
- The two 3/8" studs on the bottom of the switch are to be connected to the battery as required by NHRA.
- The upper side terminals are to be connected to the engine ground and to the magneto proper kill wire.
